

Cardiovascular System

Across

1. The division of the circulatory system that focuses on the exchange between the heart and tissues
3. Blood exits the left ventricle of the heart through this blood vessel
4. Side of the heart that contain deoxygenated blood
5. The heart ____ blood through the body
11. The division of the circulatory system that focuses on the exchange between the heart and lungs
12. Side of the heart contains oxygenated blood
13. Thick muscular walls, high in elastin, high pressure; Blood vessels that carry blood away from the heart
14. Blood enters the right atrium of the heart through this blood vessel
15. Relaxation of the heart
17. Outside layer of the heart
18. Blood flow is a ____-circuit system

Down

2. The space between the lungs here the heart lies
6. Contraction of the heart
7. Blood vessels that are one cell thick and connect arteries and veins
8. Heart muscle
9. Cardia-
10. Inner endothelial lining of the heart
16. Thinner walled, lower pressure, have valves; Blood vessels that carry blood back to the heart
